

PÖPPELMANN
TEKU

MORE EFFICIENT. NOW.

Economical and sustainable solutions for strong horticulture of the future.

The TEKU® product programme 2025.

WE. CREATE. FUTURE.

STRONGER. NOW.

DEAR READERS,

The world we live in is spinning particularly fast at the moment. Global warming and political and economic crises are creating strong headwinds. Automation, digitalisation and artificial intelligence are changing, accelerating and simplifying our processes and our everyday lives.

In order for long-term success of the commercial horticulture sector in this environment, it is not only necessary to deliver top performance, but also to save costs AND actively shape important future topics.

In our new product programme, we are presenting many new products with strong solutions for greater efficiency, reliable production and even better automation in horticulture. New bottom designs enable the production of strong plants. And of course: circular economy, resource conservation and climate protection.

SVEN HOPING

DIVISION MANAGER PÖPPELMANN TEKU®

OUR CLIMATE STRATEGY

IN FAVOUR OF THE PARIS 1.5°C TARGET.

Our climate targets were validated by:

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

We set our climate targets in December 2022. We used the methodology of the Science Based Targets initiative (SBTi) to develop the climate targets.

Successful validation followed in October 2023. The Science Based Targets initiative thus confirmed that our climate targets are in line with the 1.5 °C target of the Paris Climate Agreement.

FOR REAL CLIMATE PROTECTION

We (Pöppelmann Group) are committed to reducing our absolute greenhouse gas emissions **by 2030** compared to 2021:

50%	in Scope 1 and 2
25%	in Scope 3

FOR MORE RESOURCE CONSERVATION

Our (Pöppelmann Germany) commitment by **2025**:

100%	of manufactured packaging products are recyclable
>50%	of processed materials are post-consumer recycles
>60%	of processed materials are recycles (incl. PIR ¹)

Scope 3 (upstream)

Reduction through cooperation in the value chain for a more circular economy:

- Reduction of product weights
- Replacement of virgin material with recycled material
- Replacement of high-emission plastics (engineering plastics) with low-emission plastics (e.g. polyolefins)

¹ PIR = Post-Industrial Recyclate

HOW WE REDUCE OUR EMISSIONS TOGETHER

Our **corporate carbon footprint (CCF)** for 2022 was 283,208 tonnes of CO₂e. We will reduce the Pöppelmann Group's greenhouse gas emissions (**Scope 1 and 2**) through measures such as reducing energy consumption, expanding e-mobility and using renewable energies.

The biggest lever is the circular economy (**Scope 3**) - but we can only achieve this together. Be it through the use of recycled materials, the use of low-emission plastics or the return to the product cycle at the end of the life cycle.

With this in mind, we have consistently developed the TEKU® product range further: even more use of PCR, even more recyclability and a minimum of virgin material.

Join in now.

More at poepelmann.com/en/klima-management

We are a member of:

Pöppelmann has been accepted into the association "Klimaschutz-Unternehmen e. V." for the consistent focus of its corporate strategy on climate protection and the circular economy.

Pöppelmann is now one of 61 climate protection companies in Germany.

In accordance with the requirements for SBTi, the CCF includes all Pöppelmann locations, our plants in the USA and France included, data for 2023.

MORE CIRCULAR ECONOMY PROTECTS OUR CLIMATE.

Our product programme enables a more genuine circular economy. Discover how **Baseline** boosts the circular economy and **Circular360** closes the material loop completely. Like **Recyclable**, both categories are 100% recyclable and the material can thus be kept in the loop.

¹⁾ Plastic plus colour (masterbatch) and additives

²⁾ PCR = Post-Consumer Recyclate from unspecified sources e.g. from DE, F, DK, NL, AT, CH, NO, GB

³⁾ PIR = Post-Industrial Recyclate

⁴⁾ New goods still required for functional reasons

UP TO 2.7 TIMES MORE PRODUCTS*

EFFECTIVE
CONSERVATION
OF RESOURCES

* The result of a Fraunhofer study: In terms of resource conservation, an average of 2.7 kg of plastic products can be created from 1 kg of new plastic over the utilisation cycles.

All information on TEKU® solutions, certificates and the study can be found here:

poeppelmann.com/en/teku/Responsibility/Real-circular-economy

BEST PLANTS

MAXIMUM EFFICIENCY

Reduced cultivation time

Fast growth and healthy plants thanks to ideal irrigation and drainage.

Trouble-free destacking

Facet rim and high lateral stability ensure trouble-free destacking.

Optimum root growth

Good air and water supply is ensured with different substrate.

Better handling

Pronounced and stable rim for modern transport and spacing devices and optimum machine manoeuvrability.

Low failure rates

No impairment or damage to the roots through exposure to light.

Reduction in transport costs

Optimised diameters ensure a higher load factor – both in-house and in shipping.

Reduced labour costs

Perfect hanger lock for simple and safe installation.

EXCELLENT SELF-MARKETING

Printing and labelling

TEKU® FLEX+

- Low minimum quantities
- Intensive colour brilliance
- Photo printing also on black and coloured pots
- Refinement through varnishing

Offset printing process

- Black and white printing
- Multicolour printing with spot colours
- Promotional prints available from stock

Labelling

- Error-free barcoding
- Automated matching process

Customised design

TEKU® 3D-Studio

- TEKU's own design team
- Freely rotatable 3D model of the customised pots (3D PDF)
- Templates for many TEKU® plant pots and containers

Cover pots for plants

Coverpots

- Universal and customised designs

Alle Trays nur in der Grundaussführung angegeben.

MULTI-HOLE PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on three levels:

1st level with direct ground contact and additional irrigation and drainage channels

2nd level at a distance from the contact surface: for rapid drainage and maximum ventilation

3rd level with drainage openings on the slope (internal side slits)

PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

1st level with direct ground contact and additional irrigation and drainage channels

2nd level at a distance from the contact surface: for rapid drainage and maximum ventilation

MULTI-HOLE CROSS BOTTOM

Complete and rapid irrigation, drainage and ventilation on three levels:

1st level with optimum capillary drainage

2nd level with the highest distance to the contact surface: fast dripping drainage, maximum ventilation

3rd level with drainage openings on the slope

MULTI-HOLE STAR BOTTOM

Complete and rapid irrigation, drainage and ventilation on four levels:

1st level with optimum capillary drainage

2nd level Drainage via the centre hole

3rd level with the highest distance to the contact surface: fast dripping drainage, maximum ventilation

4th level with drainage openings on the slope (internal side slits)

MULTI-HOLE PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on four levels:

1st level with direct ground contact: Drainage through slope

2nd level with a distance of 1.5 mm to the contact surface: optimum capillary drainage

3rd level with distance to the contact surface: fast dripping drainage, maximum ventilation

4th level with drainage openings on the slope (internal side slits)

MULTI-HOLE BOTTOM WITH HIGH FEET

Complete and rapid irrigation, drainage and ventilation on three levels:

1st level with distance to the contact surface: fast dripping drainage, maximum ventilation

2nd level Drainage via the centre hole

3rd level with drainage openings on the slope

STEPPED FLOOR WITH SUPPORT FUNCTION

Complete and rapid irrigation, drainage and ventilation on three levels:

1st level with optimum capillary drainage through direct floor contact or 1.5 mm distance to the contact surface

2nd level with drainage and ventilation openings plus support function

3rd level side slits in the dome area: additional drainage and maximum ventilation

MULTI-HOLE PROFILE BOTTOM WITH CENTRE DOME

Complete and rapid irrigation, drainage and ventilation on three levels:

1st level with direct ground contact and additional irrigation and drainage channels

2nd level with distance to the contact surface: for rapid drainage and maximum ventilation

3rd level with drainage openings on the slope (internal side slits)

CROSS BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

1st level with direct ground contact and additional irrigation and drainage channels

2nd level at a distance from the contact surface: for rapid drainage and maximum ventilation (punched bottom holes on two levels)

WATER OVERFLOW

The hanging basket series with overflow dome provide the plants with a moisture reservoir.

CROSS BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

1st level with a distance of 1.5 mm to the contact surface: optimum capillary drainage

2nd level at with distance to the contact surface: for rapid drainage and maximum ventilation

3-HOLE BOTTOM

Irrigation, drainage and ventilation on one level.

8-HOLE BOTTOM

Irrigation, drainage and ventilation on one level.

XXV

9-HOLE BOTTOM

Irrigation, drainage and ventilation on one level.

XXVI

MULTI HOLE PROFILE BOTTOM WITH BAYONET LOCK

Thorough, fast irrigation and drainage as well as aeration on four levels:

1st level with direct contact to the ground:
sloped drainage

2nd level with distance of 1.5 mm to the contact surface:
optimum capillary drainage

3rd level with distance to the contact surface:
fast dripping drainage, maximum aeration

4th level with sloped drainage openings
(internal side slits)

XXVII

MULTI HOLE PROFILE BOTTOM WITH BAYONET LOCK

Thorough, fast irrigation and drainage as well as aeration on two levels:

1st level with distance of 1.5 mm to the contact surface:
optimum capillary drainage

2nd level with distance to the contact surface: fast
dripping drainage, maximum aeration

PÖPPELMANN
TEKU

[illegible]

WE. CREATE. FUTURE.

Pöppelmann is a leading manufacturer in the plastics processing industry with a strong focus on sustainability.

Founded in Lohne in 1949, the family-owned company is now active in France, the USA and China in addition to its headquarter in Oldenburg Münsterland. Every day, over 2,500 employees work on new solutions for a better future.

Pöppelmann was accepted into the association as a “climate protection company” for the consistent focus of its corporate strategy on climate protection and the circular economy.

- 1 Germany, Plant 1:
Pöppelmann GmbH & Co. KG -
Kunststoffwerk-Werkzeugbau, Lohne
- 2 France:
Plastiques Pöppelmann France S.A.S., Rixheim
- 3 USA:
Pöppelmann Plastics USA LLC, Claremont, NC
- 4 More than 2,500 employees worldwide
stand for delivery reliability, quality and
service.

OUR DIVISIONS

PÖPPELMANN® TEKU®

Innovations for growing success. The Pöppelmann TEKU® division develops and produces plant pots and professional propagation systems for commercial horticulture. The diversity of the TEKU® programme with over 600 products in more than 2,000 designs offers the optimum solution for every crop.

PÖPPELMANN® KAPSTO®

Plastic protective solutions for automotive, manufacturing, hydraulics and many other industries: KAPSTO® is the world's leading manufacturer of caps and plugs that reliably protect sensitive components. We provide a wide range of standard articles and individual solutions at the highest technical level.

PÖPPELMANN® K-TECH®

High-precision technical plastic injection moulded parts – for the highest demands in the automotive, electrical and solar industries as well as for mechanical and apparatus engineering. From project support to development and in-house mould making to series production: Pöppelmann K-TECH® is your partner from development to series production for economical and perfectly functioning solutions.

PÖPPELMANN® FAMAC®

The Pöppelmann FAMAC® division develops and produces technical parts, multi-component assemblies and packaging for the food processing and consumer goods industries as well as for the pharmaceutical and medical device industries.

Product and material specifications contained in the catalogue are based on information generally available to us, e.g. from raw material suppliers. This information does not take into account the different effects on our product that may occur in actual use in the application intended by the customer.

In particular, the information does not constitute a guarantee of quality or durability, warranted characteristics or quality agreements. This does not exempt the buyer or user from carrying out their own tests and trials for a specific intended use.

Our General Terms and Conditions of Delivery apply.

If orders include printing or labelling of products, the following additional conditions apply:

The client shall immediately check the artwork or samples sent for correction and, if they are correct, immediately issue a print approval.

The content, design and suitability of the printed image for the purpose intended by the client shall be the sole responsibility of the client, unless errors are involved which only occurred in the subsequent production process and for which the contractor is responsible.

In the case of colour reproductions in all production processes, minor deviations from the artwork do not constitute a defect. The resistance of the printed products to the effects of daylight (light fastness) is limited in particular by natural influences. Our suppliers' guide values limit the light fastness of the colours to LE 5-6 (wool scale). Due to the large number of possible external influences, the suitability for the intended purpose of the customer must be determined by the customer by means of his own tests.

If the Client provides the Contractor with texts, images, design and colour specifications and other data, in particular trademarks and/or business names, for the printing of products, the Client warrants that it holds the necessary industrial property rights

and/or other rights and that no third-party rights or applicable statutory provisions, in particular labelling, competition, environmental and food law provisions, including the provisions on required product information, are infringed in connection with the printing, reproduction, delivery and/or use of products printed therewith. The Contractor is not obliged to check for such infringements.

The Client shall indemnify the Contractor and its employees and board members against all claims for damages and expenses arising from an infringement of third-party rights or statutory provisions for which it is responsible, including any legal defence costs. The Client reserves the right to prove that it is not at fault. § Section 254 BGB shall apply accordingly. Statutory liability claims shall remain unaffected.

The Contractor expressly reserves the copyright to its own texts, sketches, drafts, layouts, samples and data.

Disclaimer: Subject to errors and changes without prior notice. Illustrations similar.
