

PÖPPELMANN
TEKU

INNOVATION PERFORMANCE. **NOW.**

The new VCL/VCM series: For optimal processes in automation and strong plant growth.

The TEKU® product programme 2026

WE. CREATE. FUTURE.

PERFORMANCE. NOW.

Dear readers,

Horticulture continues to be under considerable pressure due to rising costs, a shortage of skilled workers and demanding sales markets. Our answer: performance. Especially when it matters most.

In addition to maximum delivery reliability and quality, resource conservation, circular economy and thus climate protection are a matter of course for us. In order to be able to offer even more solutions in challenging times, we have made ourselves and our processes even more future-proof by successfully introducing a new ERP system in 2025 and investing in many new products.

Each of these product solutions is designed for maximum efficiency, stable processes and thus economic success for horticulture. Our new catalogue shows many concrete examples, such as the thermoformed VCL/VCM series for safe and stable automation processes, the MAO hanging basket series for different crop management and better plants, and new packs for space- and cost-saving transport and efficient logistics.

SVEN HOPING

INNOVATION PERFORMANCE

OUR STRENGTHS. FOR THE FUTURE OF HORTICULTURE.

New products for optimum automation, increased performance and optimal plant growth.

INNOVATIVE STRENGTH

New innovations and series regularly set standards for trouble-free automation and optimal plant growth.

PRODUCT QUALITY

Maximum process reliability and plant quality – with only 0.1% complaints.

PACE OF IMPLEMENTATION

Rapid new developments thanks to our own mould-making department.

CIRCULARITY EXPERTISE

Recyclable products and high PCR¹⁾ content – for resource conservation and climate protection.

AWARD-WINNING AND CERTIFIED.

FOR MORE RESOURCE CONSERVATION

www.blauer-engel.de/uz30a

TEKU® plant pots from the PÖPELMANN blue® initiative are certified with the Blue Angel for their use of recycled plastic (more than 80% post-consumer recycled material).

Cyclos-certified TEKU® products are proven to be 100% recyclable via the German Dual System (DSD) and comparable European household recycling collections.

¹⁾ PCR = Post-Consumer Recyclate

TOP PERFORMANCE IN SERIES

OUR NEW PRODUCTS.

With our latest developments, we are setting new standards for trouble-free processes, reliable automation and healthy plant growth – efficiently, practically and sustainably.

VCL | VCM | ROUND POTS AND CONTAINERS 5°

PATENT PENDING

- + **Excellent handling** in transport systems thanks to the newly developed crown rim.
- + **Optimal stacking properties** thanks to the newly developed rim and shoulder construction.
- + **Better irrigation and drainage** due to capillary drainage.
- + **Better drainage and oxygen supply:** Additional drainage ribs support drainage.

Further information on the VCL series can be found on page > 21

Further information on the VCM series can be found on page > 26

MAO | HANGING BASKETS

PATENT PENDING

- + **Optimised growing conditions** thanks to optimised bottom geometry for cultivation on ebb and flood floors, drip irrigation and mat irrigation.
- + **Reliable water supply during shipping, less watering required for the end consumer** thanks to the water reservoir.
- + **Improved automation features:**
Smooth bottom geometry offers advantages in automation when picking up and setting down the hanging baskets on the cultivating areas.
- + **Utility model protection** for the newly developed bottom.

Further information on the MAO series can be found on page > 62

OUR CLIMATE STRATEGY

IN FAVOUR OF THE PARIS 1.5°C TARGET.

Our climate targets were
validated by:

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Climate protection is not an option for us – it is an obligation. In order to halt global warming, we have developed ambitious targets based on scientific evidence. In December 2022, we defined our climate targets using the methodology of the Science Based Targets initiative (SBTi). Validation followed in October 2023; our targets are in line with the 1.5-degree target of the Paris Climate Agreement.

This makes us one of over 9,660 companies worldwide whose climate targets have been reviewed and confirmed by the SBTi in terms of their effectiveness.

HOW WE REDUCE OUR EMISSIONS TOGETHER

As part of our climate strategy, we calculated our corporate **carbon footprint (CCF)** for the first time for the reference year 2021. It shows where our greenhouse gas emissions originate and where we can make targeted reductions. In 2023, Pöppelmann's direct and indirect emissions totalled 234,063 tonnes of CO₂e.

The figures for **Scope 1 and 2** refer to emissions generated directly by our processes on the factory premises and by our energy consumption. We will reduce the Pöppelmann Group's greenhouse gas emissions (Scope 1 and 2) through measures such as reducing energy consumption, expanding e-mobility and using renewable energies.

Indirect **Scope 3** emissions account for a total of 90% of the CCF. The biggest lever is the circular economy (Scope 3) – but we can only achieve this together. Be it through the use of recycled materials, the use of low-emission plastics or the return to the product cycle at the end of the life cycle.

[Join in now.](#)

More at poeppelmann.com/en/company/Future/climate-strategy

SCOPE 3

RAW MATERIAL

TRANSPORT

WASTE

...

Scope 3 62.1% (upstream)

Reduction through cooperation in the value chain for a more circular economy:

- Reduction of product weights
- Replacement of virgin materials with recycled materials
- Replacement of high-emission plastics (engineering plastics) with low-emission plastics (e.g. polyolefins)

FOR REAL CLIMATE PROTECTION

We (Pöppelmann Group) are committed to reducing our absolute greenhouse gas emissions **by 2030** compared to 2021:

Reduction through energy efficiency and use of renewable energy:

- Reduction of energy consumption
- Purchase of renewable energies
- Own generation of renewable energies
- Conversion to e-mobility

Reduction through cooperation in the value chain for a more circular economy:

- Increasing the proportion of recyclable products
- Development of material cycles and infrastructure for recycling

In accordance with the requirements for SBTi, the CCF includes all Pöppelmann locations, our plants in the USA and France included, data for 2023.

We are a member of:

Pöppelmann has been accepted into the association “Klimaschutz Unternehmen e.V.” for the consistent focus of its corporate strategy on climate protection and the circular economy.

Pöppelmann is now one of 72 climate protection companies in Germany.

MORE CIRCULAR ECONOMY PROTECTS OUR CLIMATE

Our product programme enables a more genuine circular economy. Discover how **Baseline** boosts the circular economy and **Circular360** closes the material loop completely. Like **Recyclable**, both categories are 100% recyclable and the material can thus be kept in the loop.

UP TO

2.7 X

**MORE
PRODUCTS***

**EFFECTIVE
CONSERVATION
OF RESOURCES**

* The result of a Fraunhofer study: In terms of resource conservation, an average of 2.7 kg of plastic products can be created from 1 kg of new plastic over the utilisation cycles.

PÖPPELMANN TEKU® – RETURN SYSTEM

Together with you, we are shaping the future of horticulture: we are closing the loop by transforming used plant pots and trays into new products. This enables us to conserve valuable raw materials, reduce CO₂ emissions and create sustainable cultures.

BENEFITS

Closing the loop

Plant pots made of polypropylene (PP) and trays made of polystyrene (PS) without black components are processed into high-quality recyclate and flow directly back into new TEKU® products without any detours.

Open loop

Black pots and trays are also recycled – they are used in other applications instead of being incinerated. Every part remains in the material cycle.

Full service

We organise collection, transport and professional processing through our certified partners.

Cost-neutral

You will not receive any compensation, but you will also not incur any costs for commercial quantities.

CONTACT US

For a larger test phase, we are initially offering this service in the DACH and BENELUX regions. Please feel free to contact us if you are interested in setting up a material cycle.

BEST PLANTS

Reduced cultivation time

Fast growth and healthy plants thanks to ideal irrigation and drainage.

Optimum root growth

Good air and water supply is ensured with different substrate.

Low failure rates

No impairment or damage to the roots through exposure to light.

MAXIMUM EFFICIENCY

Trouble-free destacking

Facet rim and high lateral stability ensure trouble-free destacking.

Better handling

Pronounced and stable rim for modern transport and spacing devices and optimum machine manoeuvrability.

Reduction in transport costs

Optimised diameters ensure a higher load factor - both in-house and in shipping.

Reduced labour costs

Perfect hanger lock for simple and safe installation.

EXCELLENT SELF-MARKETING

Printing and labelling

TEKU® FLEX+

- Low minimum quantities
- Intensive colour brilliance
- Photo printing on all pot colours
- Refinement through varnish

Offset printing process

- Black and white printing
- Multicolour printing with spot colours
- Promotional prints available from stock

Labelling

- Error-free barcoding
- Automated approval process

Customised design

TEKU® 3D-Studio

- TEKU's own design team
- Freely rotatable 3D model of the customised pots (3D PDF)
- Templates for many TEKU® plant pots and containers

Coverpots for plants

Coverpots

- Universal and customised designs

Only basic tray versions listed.

MULTI-HOLE PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on three levels:

- 1st level** with direct bottom contact as well as additional irrigation and drainage channels
- 2nd level** with distance from the contact surface: for rapid drainage and maximum ventilation
- 3rd level** with drainage openings on the slope (internal side slits)

* with capillary drainage struts
** with centre dome

PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

- 1st level** with direct bottom contact as well as additional irrigation and drainage channels
- 2nd level** with distance from the contact surface: for rapid drainage and maximum ventilation

CROSS BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

- 1st level** with direct bottom contact as well as additional irrigation and drainage channels
- 2nd level** with a distance from the contact surface: for rapid drainage and maximum ventilation (punched bottom holes on two levels)

WATER OVERFLOW

The hanging basket series with overflow dome provide the plants with a moisture reservoir.

MULTI-HOLE PROFILE BOTTOM

Complete and rapid irrigation as well as drainage and ventilation on four levels:

- 1st level** with direct bottom contact: drainage through slope
- 2nd level** with a distance of 1.5 mm to the contact surface: optimum capillary drainage
- 3rd level** with distance to the contact surface: fast dripping drainage, maximum ventilation
- 4th level** with drainage openings on the slope (internal side slits)

PROFILE BOTTOM

Complete and rapid irrigation, drainage and ventilation on two levels:

- 1st level** with direct bottom contact as well as additional irrigation and drainage channels
- 2nd level** a distance from the contact surface: for rapid drainage and maximum ventilation

MULTI-HOLE BOTTOM

Complete and rapid irrigation, drainage and ventilation on three levels:

- 1st level** optimal capillary drainage
- 2nd level** with the highest distance to the contact surface: fast dripping drainage, maximum ventilation
- 3rd level** with drainage openings on the slope

MULTI-HOLE PROFILE BOTTOM WITH CENTRE DOME

Complete and rapid irrigation as well as drainage and ventilation on three levels:

- 1st level** Bottom holes with capillary drainage struts
- 2nd level** Drainage via the centre hole
- 3rd level** with drainage openings on the slope

STEPPED BOTTOM WITH SUPPORT FUNCTION

Complete and rapid irrigation as well as drainage and ventilation on three levels:

- 1st level** with optimum capillary drainage through direct bottom contact or 1.5 mm distance to the contact surface
- 2nd level** with drainage and ventilation openings
- 3rd level** side slits in the dome area: additional drainage and maximum ventilation

All bottoms come with a supporting function for bamboo poles.

CROSS BOTTOM

Complete and rapid irrigation as well as drainage and ventilation on two levels:

- 1st level** with direct bottom contact
- 2nd level** with a distance from the contact surface: for rapid drainage and maximum ventilation (punched bottom holes on two levels)

WATER OVERFLOW

The hanging basket series with overflow dome provide the plants with a moisture reservoir.

MULTI-HOLE BOTTOM

Irrigation, drainage and ventilation on one level.

MAO BOTTOM

Complete and rapid irrigation as well as drainage and ventilation on three levels:

- 1st level** direct bottom contact (mat irrigation)
- 2nd level** Rapid irrigation and drainage on ebb and flood
- 3rd level** water reservoir

WE. CREATE. FUTURE.

Pöppelmann is a leading manufacturer in the plastics processing industry with a strong focus on sustainability.

Founded in Lohne in 1949, the family-owned company is now active in France, the USA and China in addition to its main plant in Oldenburg Münsterland. Every day, over 2,500 employees work on new solutions for a better future.

Pöppelmann has been accepted into the association as a "Klimaschutz-Unternehmen e.V." for the consistent focus of its corporate strategy on climate protection and the circular economy.

1 Germany, Plant 1:
Pöppelmann GmbH & Co. KG Kunststoffwerk -
Werkzeugbau, Lohne

2 France:
Plastiques Pöppelmann France S.A.S., Rixheim

3 USA:
Pöppelmann Plastics USA LLC, Claremont, NC

4 More than 2,500 employees worldwide stand
for delivery reliability, quality and service.

OUR DIVISIONS

PÖPPELMANN® TEKU®

Innovations for growing success. The Pöppelmann TEKU® division develops and produces plant pots and professional propagation systems for commercial horticulture. The diversity of the TEKU® programme with over 600 products in more than 2,000 designs offers the optimum solution for every crop.

PÖPPELMANN® KAPSTO®

Plastic protective solutions for automotive, manufacturing, hydraulics and many other industries: KAPSTO® is the world's leading manufacturer of caps, plugs and thermoformed trays that reliably protect sensitive components. We provide a wide range of standard articles and individual solutions at the highest technical level.

PÖPPELMANN® K-TECH®

High-precision technical plastic injection moulded parts – for the highest demands in the automotive, electrical and solar industries as well as for mechanical and apparatus engineering. From project support to development and in-house mould-making department. to series production: Pöppelmann K-TECH® is your partner from development to series production for economical and perfectly functioning solutions.

PÖPPELMANN® FAMAC®

The PÖPPELMANN FAMAC® division develops and produces technical parts, multi-component assemblies and packaging for the food processing and consumer goods industries as well as for the pharmaceutical and medical device industries.

Product and material specifications contained in the catalogue are based on information generally available to us, e.g. from raw material suppliers. This information does not take into account the different effects on our product that may occur in actual use in the application intended by the customer.

In particular, the information does not constitute a guarantee of quality or durability, warranted characteristics or quality agreements. This does not exempt the buyer or user from carrying out their own tests and trials for a specific intended use.

Our General Terms and Conditions of Delivery apply.

If orders include printing or labelling of products, the following additional conditions apply:

The client shall immediately check the artwork or samples sent for correction and, if they are correct, immediately issue a print approval.

The content, design and suitability of the printed image for the purpose intended by the client shall be the sole responsibility of the client, unless errors are involved which only occurred in the subsequent production process and for which the contractor is responsible.

In the case of colour reproductions in all production processes, minor deviations from the artwork do not constitute a defect.

The resistance of the printed products to the effects of daylight (light fastness) is limited in particular by natural influences. Our suppliers' guide values limit the light fastness of the colours to LE 5-6 (wool scale). Due to the large number of possible external influences, the suitability for the intended purpose of the customer must be determined by the customer by means of his own tests.

If the Client provides the Contractor with texts, images, design and colour specifications and other data, in particular trademarks and/or business names, for the printing of products, the Client warrants that it holds the necessary industrial property rights and/or other rights and that no third-party rights or applicable statutory provisions, in particular

labelling, competition, environmental and food law provisions, including the provisions on required product information, are infringed in connection with the printing, reproduction, delivery and/or use of products printed therewith. The Contractor is not obliged to check for such infringements.

The Client shall indemnify the Contractor and its employees and board members against all claims for damages and expenses arising from an infringement of third-party rights or statutory provisions for which it is responsible, including any legal defence costs. The Client reserves the right to prove that it is not at fault. § Section 254 BGB shall apply accordingly. Statutory liability claims shall remain unaffected.

The Contractor expressly reserves the copyright to its own texts, sketches, drafts, layouts, samples and data.

Disclaimer: Subject to errors and changes without prior notice. Illustrations similar.
